## Abstract

This template helps you to create a properly formatted LATEX manuscript.

Keywords: elsarticle.cls, LATEX, Elsevier, template

2010 MSC: 00-01, 99-00

#### 1. The Elsevier article class

Installation. If the document class elsarticle is not available on your computer, you can download and install the system package texlive-publishers (Linux) or install the LATEX package elsarticle using the package manager of your TEX installation, which is typically TEX Live or MikTEX.

Usage. Once the package is properly installed, you can use the document class elsarticle to create a manuscript. Please make sure that your manuscript follows the guidelines in the Guide for Authors of the relevant journal. It is not necessary to typeset your manuscript in exactly the same way as an article, unless you are submitting to a camera-ready copy (CRC) journal.

Fully documented templates are available in the elsarticle package on CTAN.

<sup>\*</sup>Corresponding author

 $<sup>^1</sup>$ Since 1880.

Functionality. The Elsevier article class is based on the standard article class and supports almost all of the functionality of that class. In addition, it features commands and options to format the

- document style
- baselineskip
  - front matter
  - keywords and MSC codes
  - theorems, definitions and proofs
  - lables of enumerations
- citation style and labeling.

## 2. Front matter

The author names and affiliations could be formatted in two ways:

- (1) Group the authors per affiliation.
- (2) Use footnotes to indicate the affiliations.
- See the front matter of this document for examples. You are recommended to conform your choice to the journal you are submitting to.

## 3. Bibliography styles

There are various bibliography styles available. You can select the style of your choice in the preamble of this document. These styles are Elsevier styles based on standard styles like Harvard and Vancouver. Please use BibTEX to generate your bibliography and include DOIs whenever available.

Here are two sample references: [1, 2].
